

Segmental/Modular retaining wall systems are comprised of geogrid reinforcing materials, concrete retaining wall units and available soils for form a unique reinforced earth retaining system.

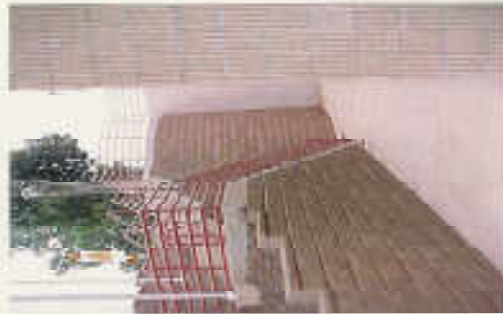

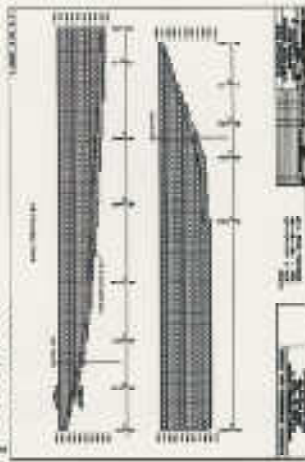

Applications for these systems include commercial site grade changes, shoreline protection, residential decorative landscaping, Department of Transportation projects, and industrial facility site projects.

### Engineering Services Include:

- ◆ Segmental/Modular retaining wall design, construction plans & specifications

- ◆ Preliminary retaining wall design analysis (quantity take-offs)
- ◆ On-site engineering assistance
- ◆ Conceptual planning assistance
- ◆ Turn-key retaining wall project management

*Worldwide Engineering has the experience that is a requirement for participating in the segmental retaining wall systems market. Since 1993, our company has a history of over 2,300 segmental retaining wall designed projects totaling more than 6.2 million square feet.*

### Project Locations:

- ✓ North Carolina
- ✓ South Carolina
- ✓ Georgia
- ✓ Virginia
- ✓ Tennessee
